

Vision Statement: Create and retain high tech jobs by accelerating the commercialization of emerging technologies through access to capital investment.

Mission Statement: Retain and create jobs by accelerating the commercialization of emerging technologies leading to the creation of new businesses and new business product lines in existing businesses.

- Leveraging current and emerging regional skill sets
- Focusing on regional technology clusters – Bioscience, Research and Development, Defense & Homeland Security, Maritime, Energy & Environmental, and Creative Digital Technologies
- Providing access to capital investments in the earliest pre-seed stages of development

Form of Ownership: Non-stock Connecticut 501(c)(3) Non-Profit Corporation Founded 1992.

Products and Services:

- TECHCONN provides capital investments in new businesses and new product lines. These capital investments focus on early-stage prototype development, proof of concept, and commercialization after prototype development and proof of concept.
- As part of the project and investment selection process TECHCONN performs a gap analysis to determine those areas of focus that are required for commercial success.
- TECHCONN provides hands on technical and business mentoring and advice for entrepreneurs and angel investors.
